RODRIGO ITURSARRY
Date of birth: 1984-10-10
Location: La Plata, Argentina
E-mail: itursarry@gmail.com

Objective/Profile:

I have worked in different roles and technologies along my twelve years of career. But if I had to define myself in a few words it could be: team leader, java senior, proactive and adaptive.

I'm looking for a position to develop new applications because I would like to work with the latest technologies. Although I have the capability to manage human resources my interest is to be close to developing tools too. I have also proved to be an effective team worker and have practical work behavior.

Experience

2015-06 / Actual, Buenos Aires City.
Scrum master and java full stack, DGSIAF.
